

# Support Vector Machine

Acoyani Garrido Sandoval

## ***Index Terms***—Support Vector Machine

### I. SVM

#### *A. Questions*

*a) Question 1:* How does an SVM work? What the main differences from traditional statistical techniques?

a

*b) Question 2:* Explain the main differences among Support vector machine (SVM), Logistic regression (LR) Linear discriminant analysis (LDA)

Hhhhhh

*c) Question 3:* Explain what is a kernel transformation and How does the kernel transformation may enhance the performance of SVMs when dealing with non-separable data?
